ABOUT ME

I am Md. Ehsanul Haque, a frontend web developer. I have skills in HTML5, CSS3, Javascript & JQuery programming languages. So far I have worked on a few projects as practice. By the grace of Allah I can build custom coded website without using any website builder CMS, so such website load very fast which is comfortable for the user. Also, the website is not built with the conventional website builder CMS and page builder, the website does not look traditional, it has a unique and modern design. Every website I build is coded SEO friendly and responsive, moreover, I do on page SEO of each website. If photo editing is required for building a website, then I do photo editing as well. I create multipage website, landing page, one page website etc.
